Coastal Protection

BEAUTY BALANCED WITH SAFETY

When enjoying a beautiful coastal view, technology is the last thing on your mind. But with coastal storms, humidity and windborne debris, it's high on our list of priorities. Sitaline® wood windows and patio doors with ImpactGard are designed to help keep your home and family safe while providing the beautiful look requisite for such a locale. ImpactGard is a balance of function and style designed to withstand a 2x4 flying at 34 mph, as well as the judging glances of the most discerning neighbor.

THE MIGHTY CLIP

One unobtrusive little clip on each side of the rail enables the use of ImpactGard™ glass, which takes the brute force of storms and diffuses it into the frame and wall. Because the clip is inconspicuous, the look is simply beautiful rather than fortress-like. It's amazing what a bit of engineering can do.

WITH IMPACTGARD	WITHOUT IMPACTGARD	NO BROKEN GLASS INSIDE
		
<p>ImpactGard™ glass is designed to withstand a nine-pound piece of lumber launched at 34 mph. In most jurisdictions, ImpactGard will satisfy the requirement for storm shutters. Check with your local building official.</p>	<p>In hurricanes and other storms, winds look for a breach to get inside your home. If a window is knocked out, the roof can be the next thing to go, getting torn off from the inside out. ImpactGard protects against that.</p>	<p>ImpactGard is designed with glazing on the outside of the window so that, in the event of breakage, most of the broken glass adheres to the protective inner layer or falls to the outside of your home.</p>

AuraLast™

AuraLast® pine is a patented wood product that provides protection against wood rot, water damage and termites. This water-based process fortifies wood all the way to the core, providing an exclusive level of protection you'll only find through JELD-WEN.

LIMITED
LIFETIME[†]
WARRANTY

EASY ON THE ENVIRONMENT

Water-based process releases up to 96% fewer volatile organic compounds (VOCs) during the manufacturing process than traditional solvent-based methods.

WET WEATHER PROTECTION

Whatever the climate, AuraLast® protects against water damage and rot like no other. Whether it's humidity, storms or dampness, AuraLast® pine stands up to the rigors of wet weather.

TERMITE PROTECTION

Termites can be devastating to windows and doors, but not to those built with AuraLast® pine. It safely and effectively repels termites, preserving the beauty of your investment.

Casement Windows

A VIEW THAT'S A BREATH OF FRESH AIR

These versatile windows are a must-have for coastal living. Paired with fixed or other operating styles, they open outward, allowing top-to-bottom ventilation into the house. A deep sash creates intrigue, casting shadows for architectural interest.

CLEAN SIGHT LINES

A new glazing profile creates clean, crisp lines that add a contemporary elegance. It helps bridge the emerging trends of today with many of the guidelines necessary to match historical homes. Square or angled profiles available.

STRENGTH IN BEAUTY

A more substantial layer of aluminum on the sash and frame give these windows their sleek shape and guarantee that they keep it. The heavier-duty aluminum stands up beautifully to the rigors of coastal climates.

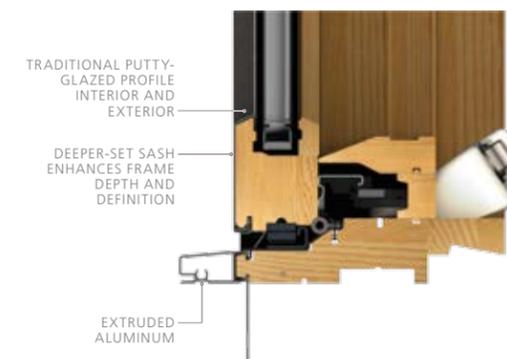

Awning Windows

Placed over doors or in combination with other windows, the awning makes a unique and practical statement.

In addition to aesthetics, airflow gets a boost from window placement that helps circulate air through an entire room.

FEATURES AND BENEFITS

For a window that stays out of the way, there's a lot to notice. A handsome folding handle provides flawless operation, while a variety of sizes, colors and interior wood species add to the look.

Double-Hung Windows

UNIVERSAL APPEAL

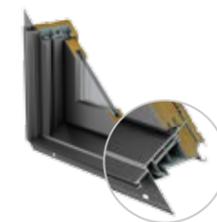

At first glance, you see a classically beautiful Sitaline® wood window. It is only when opened (easily) that a small clip serves as the lone visual reminder of the safety inherent in Sitaline® ImpactGard™ windows. It's a look that's very easy to live with.

THE IDEAL COASTAL WINDOW

Enjoy coastal breezes and salt air with an upper and lower sash that slide vertically past each other in a single frame. A concealed jamb liner provides a clean and architecturally focused look. Both sash tilt in for convenient cleaning.

THERMAL DIVIDE

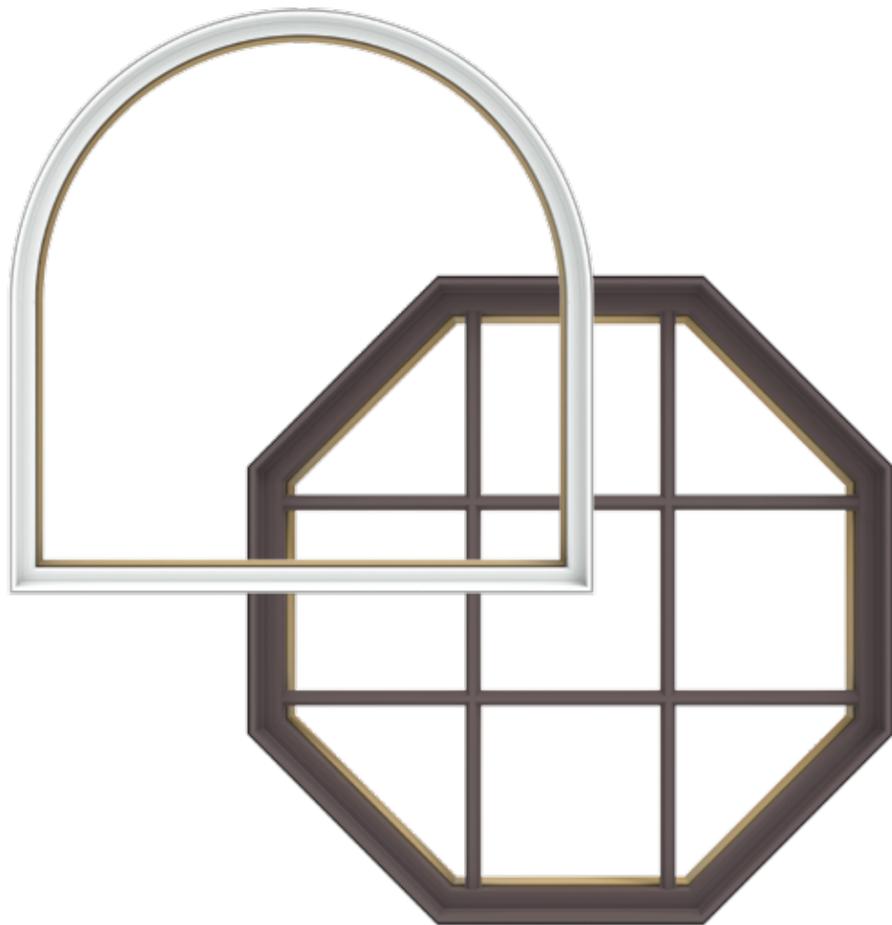

Chambered construction in the sill adds structural integrity. This composite underpinning also increases energy efficiency, making it easier to maintain the temperature of your home.

Fixed, Radius and Geometric Windows

TECHNICALLY BEAUTIFUL

Add an air of distinction to any home, showcase beautiful views and create an intriguing look with unique shapes and sizes. Radius and geometric in-sash windows are available as fixed or operating units in a variety of half-round and rectangular shapes and sizes.

SOLID WOOD

Whichever shape you choose, Sitaline provides solid wood and no composites. This means that species and grains coordinate; that stain or paint is accepted the same from window to window. It's authenticity that runs through your entire home.

ENERGY EFFICIENT GLAZING

Whether it's tropical heat or winter cold, Sitaline keeps you on the comfortable side of the glass. Double and triple panes of glass, argon gas fill, Low-E glass and other options help minimize heat transfer.

MATCHING FRAME PROFILES

A clean, contemporary look is carried throughout the entire line. Details like square or angled frame profiles match from one window style to the next, meaning you can count on Sitaline to create a cohesive look for your entire home.

Swinging Patio Doors

CONTEMPORARY RESILIENCE

Create a dramatic entrance to your home on a scale as grand as you like. One- and two-panel swing options are available. These timeless doors swing out and create a functional focal point. Numerous options let you customize the look to match your personal preferences.

SIDELITES

When you want more light but not more door, sidelites are an excellent choice. These are available on one-panel patio doors or individually. They bring the outdoors indoors and seamlessly complete the look of a room.

HARDWARE

Stainless steel hardware provides a clean, contemporary look and is offered as a standard feature. Like ImpactGard™ glass, it stands up to the rigors of coastal climates and operates flawlessly every time.

Sliding Patio Doors

UNENCUMBERED VIEWS

These doors are a great option when an open, airy look is required but space is limited. They provide a picture-window view in addition to wide-open access with one panel that slides effortlessly and one fixed panel that remains in place.

STILES AND RAILS

Siteline® sliding patio doors are available with either wide or narrow stiles and rails. This option enables the doors to be configured to fit most any space as well as architectural style.

WIDE STILE

NARROW STILE

Finishes and Trim

EXTERIOR OPTIONS

This is where you decide what your door or window will look like from the outside of your home.

Custom colors are available, or upgrade your standard color to include PVD protection against color fade with a 10-Year Limited Warranty.*

EXTERIOR TRIM

CLAD

STANDARD CLAD COLORS

OPTIONAL CLAD COLORS

Note: Color swatches are for representation only and may not match our colors exactly.

ANODIZED FINISH COLORS

INTERIOR OPTIONS

AuraLast® pine construction stands up to water damage, rot, termites and humidity. Other wood species also available.

STANDARD INTERIOR FINISHES

1. Brilliant White
2. Ivory
3. Desert Sand
4. Clear Lacquer
5. Wheat
6. Cider
7. Fruitwood
8. Cordovan
9. Walnut

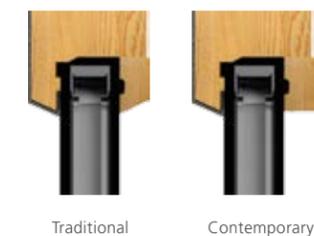

INTERIOR TRIM

INTERIOR GLAZING STOPS

Our traditional sash profile replicates the look of a historical putty-glazed window. The optional contemporary profile brings a simple clean line for modern interior design.

Note: Color swatches are for representation only and may not match our colors exactly.

Glass Options

MAKE IT YOURS

Here you can choose from a variety of styles to make glass much more than just transparent.

TINTED GLASS

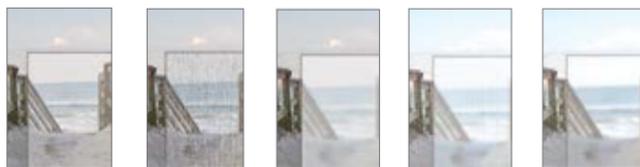

Tinted glass reduces glare, and is ideal for areas that get a lot of direct sunlight in the summer. We offer green, gray, bronze, reflective gray and reflective bronze tinted glass.

Green Gray Bronze Reflective Gray Reflective Bronze

TEXTURED GLASS

Let light in while maintaining privacy with textured glass. We offer a wide range of textures to meet your aesthetic preferences. Five of our most popular choices are shown here.

Glue Chip Rain Obscure Narrow Reed Seedy Reamy

SPACER BARS

For even more versatility, spacer bar color options enhance the appearance of your windows. Stainless steel comes standard.

Stainless Steel Black Gray

ENERGY SAVING GLASS OPTIONS

ENERGY STAR®

Many JELD-WEN® windows and doors are ENERGY STAR® certified, which means they exceed the minimum energy code requirements for the climate region in which you live. JELD-WEN has been a proud ENERGY STAR® partner since 1998.

PRESERVE® PROTECTIVE FILM

Standard for all Sitaline® wood and clad-wood windows and patio doors, this film is factory-applied to both sides of the glass. It protects against debris and scratches during shipping and handling or at a construction site. It's easy to remove and saves cleanup time after installation.

NEAT® GLASS

This is a natural cleaning convenience that comes standard for all Sitaline® wood and clad-wood windows and patio doors. By harnessing the sun's UV rays to loosen dirt from the glass, rainwater can easily rinse away grime. No manual activation is required.

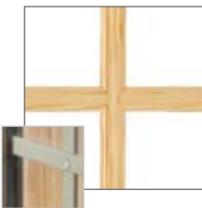

TEMPERED GLASS

This type of glass is treated with heat, so it can withstand greater force or pressure on its surface, and it will not break into sharp pieces.

Divided Lites

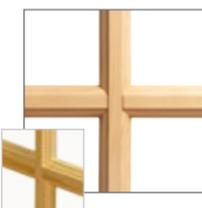

Add architectural interest to your JELD-WEN® Sitaline® wood and clad-wood windows with one of our decorative grille options. These options include simulated divided lites (SDL) for an authentic look, full-surround (FS) wood grilles that can be removed for easy cleaning, and maintenance-free grilles between the glass (GBG).

SIMULATED DIVIDED LITES (SDL)

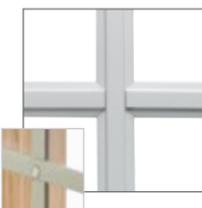

Our permanently attached wood grilles create a truly authentic look. Grilles are adhered to the interior glass, while exterior grille options include aluminum for clad wood or wood for primed wood. The optional light brown or silver shadow bars are placed between the two panes of insulating glass to complete the effect. Interior and exterior SDL grilles are available in decorative beaded or subtle putty profiles.

FULL SURROUND (FS) WOOD GRILLES

Enjoy low-maintenance beauty with our full-surround wood grilles that can be removed for easy cleaning. Choose from 7/8", 1 1/8" or 1 3/8" grilles that are positioned on the interior glass surface.

GRILLES BETWEEN THE GLASS (GBG)

This option provides style without the upkeep. Select 5/8" flat or 23/32" or 1" contour metal grilles in many of our clad colors.

Decorative grilles are also available in woodgrain finishes.

Screens*

Today's screen options are capable of much more than keeping out insects. With a fine, black fiberglass mesh and light gloss finish, BetterVue® insect screens are now standard for awning, casement and double-hung windows. UltraVue® offers all the benefits of BetterVue, including improved optical clarity, but in a finer fiberglass or aluminum mesh screen, available in charcoal or silver finish.

BETTERVUE® SCREEN

View through BetterVue® insect screen (standard)

ULTRAVUE® SCREEN

View through optional UltraVue® insect screen

PATIO DOOR SCREENS

As on our windows, BetterVue® screens are standard on patio doors. However, you can choose either a bottom-rolling extruded (regular or heavy duty), or a top-hanging screen.

SWINGING SCREENS

Historically detailed swinging screens for casement and awning windows match wood and hardware finishes.

PHANTOM SCREENS® TECHNOLOGY

These retractable screens provide wide-open views when you want them or breezy protection from the outdoors when you need it. They're durable, easy to operate and are available on awning, casement and double-hung windows. Screens for double-hung windows also have a removable track that allows the sash to tilt in for easy cleaning.

*Insect screens are intended to allow air and light in, while keeping insects out. They are not intended to stop children from falling through an open door or window. For safety screens and other security devices, contact your local building supply retailer.

Window Hardware

OPEN TO DESIGN

All hardware pieces are created to beautifully complement the look and style of the windows while operating with surgical precision. There's a certain heft to the quality that you'll feel in the form and finish of every hinge, knob, lock and pull.

STANDARD FINISHES

White Desert Sand Chestnut Bronze Powder-Coat Black

OPTIONAL FINISHES

Brushed Chrome Polished Brass Antique Brass Oil-Rubbed Bronze Satin Nickel

WINDOW HARDWARE OPTIONS

Casement and Awning	Double-Hung
STANDARD FOLDED NESTING HANDLE	CONCEALED SASHLOCK
	

Note: Color swatches are for representation only and may not match our colors exactly.

WINDOW OPENING CONTROL DEVICES (WOCD)

Windows can be necessary for emergency escape and rescue, requiring certain windows to fully open. Factory-installed WOCD from JELD-WEN are designed to meet the ASTM F2090-10 standard intended to help prevent accidental falls from windows by children five years of age and younger. A WOCD automatically limits the sash opening to less than four inches, unless it is deliberately disengaged, allowing the sash to fully open. The streamlined design preserves the beautiful appearance of your windows and won't obstruct views.

CASEMENT WOCD

WOCD limits the sash opening to less than four inches

DOUBLE-HUNG WOCD

Window Closed

Window Open

FEATURES AND BENEFITS

- Streamlined design won't obstruct views like many after-market options
- Automatically limits sash opening to less than four inches
- Manual override for full operation and for emergency escape and rescue
- Device automatically resets by closing the window
- Available on double-hung and casement windows
- Potential alternative to minimum sill height requirement (consult local building codes)

Patio Door Hardware

FULLY OPERATIONAL

The styles and finishes add to the elegance while the ease of operation and various locking options add to the security. Finish your patio with the hardware that's just right.

FINISHES

At JELD-WEN, security is something we take very seriously, which is why we provide multipoint locking hardware standard. From there, the design options let you take the look just about anywhere.

Note: Color swatches are for representation only and may not match our colors exactly.

About JELD-WEN

DEDICATION FROM DAY ONE

Since 1960, when JELD-WEN began with one millwork plant, we've been dedicated to crafting windows and doors that enhance the beauty and functionality of your home. Today we continue that tradition with products that are durable and worry-free. It's the result of innovation as the driving force in all that we do. It begins in the forests where our premium lumber is harvested. In addition to responsible sourcing practices, we reuse and recycle as much of our raw resources as possible. Innovation is also at the heart of our design and manufacturing process. With JELD-WEN, you can expect products that are more than just beautiful on the outside. The inner workings of our windows and doors are engineered to function flawlessly for years to come.

Siteline® Coastal wood windows and patio doors with ImpactGard™ are certified to meet Impact Wind Zone 3 and have achieved Florida Product Approval. Meets PG50, DP+50/-65 is sufficient. Note the patio door is only PG50, DP+50/-50.
